CANAL BOAT RANGE

TRADITION IN EXCELLENCE SINCE 1869

GOLDEN FILM

CANAL BOAT RANGE

A selection of lubricants and ancillary products to assist with the maintenance and servicing of canal boats.

ENGINE OILS

GOLDEN FILM SAE 10W-40

Golden Film SAE 10W-40 is a high quality multigrade engine oil designed for use in canal boats. The additive level has been chosen and optimised to prevent bore glazing or bore polishing, whilst keeping engine components clean and protecting them from wear and corrosion.

The SAE 10W-40 classification makes the lubricant suitable for use in all canal boat engines where an SAE 15W-40 may be required. SAE 10W-40 will flow more rapidly at low temperatures providing improved component protection.

Performance Level: API CC/SF

GOLDEN FILM SAE 20W-50

Golden Film SAE 20W-50 is a high quality, low detergent multigrade engine oil and is formulated with the same care as the Golden Film monogrades.

The multigrade properties of Golden Film SAE 20W-50 provide improved cold start over monograde engine oils, allowing the oil to circulate faster but still provide good working oil pressure. The additive level has been optimised to reduce the risk of bore glazing.

Performance Level: API SF/CC

GOLDEN FILM MONOGRADERS

Golden Film SAE 20, 30, 40 and 50 are high quality, low detergent monograde oils carefully formulated for use in classic, vintage and veteran motorcycles, cars, commercial and agricultural vehicles. Traditional oil properties are combined with the correct level of modern additives to produce a strong and capable lubricant ideal for older vehicles and equipment.

Golden Film monograde oils are an excellent choice for older engines without full flow filters (including VW air-cooled 1960's/70's engines). Proven anti-foam performance makes them ideal for classic gearboxes requiring monograde oils.

The optimised level of additive treatment also makes the Golden Film monogrades suitable for use in lightly loaded engines, such as in canal boats, where the risk of bore glazing is virtually eliminated.

Performance Level: API CC/SD

MAINTENANCE PRODUCTS

GOLDEN FILM FLUSHING OIL

Golden Film Flushing Oil is a combination of highly refined light mineral oils and detergent/dispersant additives to enhance removal of sludge and lacquers. Flushing Oil can be used where a system's history is unknown or the service fill lubricant may have been used beyond its oil-drain interval. This product can also be used if the service fill lubricant has to be drained because of a contamination problem. Golden Film Flushing Oil can be used in petrol and diesel engines, hydraulic systems and compressors.

GOLDEN FILM RUNNING-IN OIL

Golden Film Running-In Oil is a speciality SAE 30 product that should be used for the running-in of new or rebuilt petrol and diesel engines, where it promotes the quick and safe bedding in of mating surfaces. The use of this product during the running-in period assists the formation of important oil retaining surfaces, whilst preventing the possibility of bore glazing.

BUY ONLINE

ANCILLARY PRODUCTS

AQUAMAX 2

Developed to meet the need for a specialised ash free outboard motor oil, providing an excellent lubricating film that leads to improved engine performance and reduced wear for engine components.

SUPERCLEAN MORENDO DD

Designed to be added to diesel and distillate burner fuels in bulk storage tanks, or to the fuel tanks of diesel engine vehicles and marine craft.

K99 WATER RESISTANT GREASE

Calcium complex grease for water pump bearings and other wet applications.

TERRALUS AQUA SPORT

Fully synthetic biodegradable marine two stroke lubricant. Recommended for use in two cycle water-cooled engines using premix or oil injection.

K2 EP LITHIUM COMPLEX

A multipurpose grease providing excellent high temperature performance and water wash-out resistance.

UNIVERSAL ANTI-FREEZE

Universal Anti-freeze will protect all engines from frost damage right down to -34°C and ice damage down to -50°C.

CADENCE TFR

An advanced cleaner that is safe to use on paint work, metal surfaces, glass and rubber. Can be used hot or cold.
